

MCX Series

Description

MCX provides broadband capability through 6GHz. A range of connector configurations is available including printed circuit board and cable connectors. This series gives design engineers options in Applications where weight and physical space are limited.

Applications

- Telecommunications
- Instrumentation
- Wireless
- Process Controls
- PC/LAN

Features

Low cost combined with high quality.
Broadband performance with low reflection DC to 6GHz.
Quick connect/disconnect snap-on mating.
50 ohm impedance.
