

# TNC Series

---

## Description

TNC connectors are miniature, weatherproof units which have constant 50 ohm impedance and operate in the 0-11 GHz frequency range. These features make TNC connectors an ideal choice for use in cellular mobile communications, and test and instrument equipment. TNC connectors are also widely used in airframe, aerospace and radar applications where extreme vibration is a factor.

## Applications

- Cellular Mobile Phones
- Test and Measurement
- Computer Network/LANs
- Microwave Components (Filters, Diplexors)
- Aircraft and Missile
- Instrumentation
- Radar
- Base Stations

## Features

- These connectors are suitable for use in applications where safety can not be compromised such as test and measurement, and medical equipment.
